SKILLS

SPSS · Quantum · Market Research Data Processing · Data Validation · Quality Control · Team Leadership · Data Tabulation · Survey Programming · Process Leadership · End-to-End Data Processing · Automation Initiatives · Q Research · Data Handling · AI Open-End Coding · IBM Dimensions · Power BI · PostgreSQL · Python · React.js · Django · Excel VBA · Forsta · Qualtrics · XEBO · SurveyToGO · OpenAI GPT · Google Gemini API · Claude API

PROFESSIONAL SUMMARY

Experienced Head of Data Processing with 14+ years of expertise in market research data processing and proven ability in team handling and process leadership. Strong expertise in SPSS for data validation and quality checks, with advanced experience in data tabulation and end-to-end data processing & quality control. Successfully managed teams of 10+ data analysts while delivering high-quality outcomes for global research projects. Extensive exposure to automation initiatives and client-ready tabulations, with proven track record in managing complex workflows and achieving 99%+ data accuracy standards. Combines strong technical skills in survey programming platforms with leadership experience in driving process improvements and team development.

EDUCATION

M.C.A.
Sri Ramakrishna Engineering College, Coimbatore
2010 • 7.5 CGPA

B.Sc. Physics
Thiyagarajar College, Madurai
2007 • 60.31%

WORK EXPERIENCE

Head of Data Operations
Jedhru Informatics Private Limited | Mar 2024 - Present

Lead and manage a team of 10+ data analysts and developers with expertise in market research data processing and team handling. Oversee end-to-end project delivery for multiple concurrent survey research projects ensuring quality control and data validation standards. Establish data quality standards and SOPs achieving 99%+ accuracy through advanced SPSS validation processes. Developed AI-powered open-end coding system using LLMs, reducing manual coding by 85% while maintaining data tabulation quality. Built automated SPSS syntax generator for data cleaning, recoding, and client-ready tabulations.

Data Head
Altmeta Knowledge Services Private Limited | Jan 2022 - Feb 2024

Led technical strategy for data processing and analytics operations with focus on process leadership and automation initiatives. Implemented Python automation reducing operational costs by 40% through enhanced data validation workflows. Led GTI (Global Travel Intention) project across 40+ countries with 25+ language overlays, demonstrating expertise in complex market research data processing. Managed cross-functional teams delivering solutions for global clients with emphasis on end-to-end data processing and quality control. Designed data quality frameworks achieving 99%+ accuracy using advanced SPSS techniques. Developed comprehensive Project Management System using React + Django + PostgreSQL for streamlined data tabulation processes.

Data Processing Manager
Altmeta Knowledge Services Private Limited | Nov 2016 - Dec 2021

Specialized in survey programming and market research data processing across multiple platforms including Qualtrics, Forsta, SurveyTogo, and XEBO. Developed comprehensive automation initiatives using Excel VBA and Python for enhanced data validation and quality control processes. Created advanced SPSS syntax for data cleaning, transformation, and client-ready report generation, ensuring high-quality outcomes for research projects. Implemented end-to-end data processing workflows that improved operational efficiency and data tabulation accuracy.

Analytics Manager
Abacus Market Analytics (IMRB International) | Sep 2011 - Aug 2015

Engaged in comprehensive market research data processing including data cleansing, computation, and creation of high-quality data tabulations using SPSS, ensuring timely deliverables and quality control standards. Developed FOXPRO data entry program and created Excel VBA macros for automation initiatives, streamlining data validation processes and improving overall workflow efficiency in research data processing operations.
